Qualità e innovazione dal 1977

Paperlynen Pal Caps nasce a Barga (LU) nel 1977 come importatore e distributore di indumenti monouso. A metà anni Novanta la gamma si amplia con l'introduzione di stoviglie monouso biodegradabili, fino a crescere e differenziarsi in 3 macrosettori che determineranno il successo dell'azienda: Ho.Re.Ca, Industriale e Sanitario. Per garantire il meglio alla propria clientela, Paperlynen aderisce a diverse certificazioni volontarie e gestisce con attenzione i sistemi di gestione con una catena di controllo che parte dai fornitori in estremo oriente e termina all'arrivo della merce in magazzino, dove collaudi programmati verificano la conformità degli articoli. Lo stoccaggio e la spedizione avvengono per lotto garantendo la tracciabilità. Una solida struttura organizzativa coordina approvvigionamento, certificazioni, ambito regolatorio, qualità e post vendita per assicurarsi che la soddisfazione del cliente sia sempre il primo presupposto della mission aziendale.

Quality and Innovation Since 1977

Paperlynen Pal Caps was founded in Barga (LU) in 1977 as an importer and distributor of disposable garments. In the mid-nineties, the range expanded with biodegradable disposable tableware, growing into 3 macro-sectors: Ho.Re.Ca, Industrial and Healthcare. To guarantee the best for its customers, Paperlynen adheres to various voluntary certifications and carefully manages quality systems with a control chain from Far East suppliers to warehouse arrival, where periodic tests verify product compliance. Storage and shipping by lot ensure traceability.

Qualität und Innovation seit 1977

Paperlynen Pal Caps wurde 1977 in Barga (LU) als Importeur und Vertreiber von Einwegbekleidung gegründet. Mitte der neunziger Jahre erweiterte sich das Sortiment um biologisch abbaubares Einweggeschirr und wuchs in 3 Makrosektoren: Ho.Re.Ca, Industrie und Gesundheitswesen. Um das Beste für seine Kunden zu gewährleisten, hält Paperlynen verschiedene freiwillige Zertifizierungen ein und verwaltet sorgfältig Qualitätssysteme mit einer Kontrollkette von fernöstlichen Lieferanten bis zur Warenankunft im Lager, wo regelmäßige Tests die Produktkonformität überprüfen.
